

AI-Powered DDQ Automation for Faster Fundraising

Investor due diligence questionnaires (DDQs) are critical to the fundraising process in alternative investments. Yet for most investor relations (IR) teams, completing them is a manual, fragmented and time-consuming process. Responses are often sourced from outdated documents, coordinated across multiple stakeholders via email, and repeatedly revised to manage version control. At the same time, limited partner (LP) requests continue to increase in both volume and complexity.

FundCentre™ Fundraising transforms DDQ completion into a streamlined, AI-powered workflow — reducing turnaround times from weeks to hours while improving accuracy, transparency and collaboration.

Powered by our proprietary AI assistant, Link, FundCentre AI centralizes institutional knowledge, automates response drafting, and provides full lifecycle visibility — all within one secure platform.

AI-assisted DDQ drafting within FundCentre AI:

- Link searches designated fund documents and materials
- Instantly retrieves relevant content and supporting content
- Generates structured draft responses to DDQ questions
- Automatically populates standardized data fields to reduce manual entry

End-to-end workflow management

- Supports both GP- and LP-initiated DDQs
- Centralizes reference documents and response materials in one location
- Provides real-time status updates, notifications and workflow visibility

Built-in governance and collaboration

- Maker-checker review workflows to support internal controls
- Full version control and a comprehensive audit trail
- In-app GP-LP commenting and messaging for streamlined communication

Key features

- AI-powered content retrieval and response generation
- Centralized DDQ response library
- Structured data auto-population
- Full historical visibility and audit-ready records
- Integration with FundCentre Onboarding and FundCentre Reporting

Why choose FundCentre AI?

- Accelerate fundraising timelines and close your fund more quickly
- Respond to LP DDQ requests faster and with greater efficiency
- Reduce manual drafting and coordination across IR, compliance, operations, finance and placement agents
- Deliver consistent, high-quality responses to investor requests
- Standardize workflows to eliminate outdated or conflicting information
- Reduce operational and compliance risk
- Demonstrate operational excellence and transparency to LPs

See how FundCentre Fundraising helps IR teams streamline DDQs and accelerate capital raising.
